Did the bank charge customers after its own process failed? - 2023 control review

Hi team,

Compliance wants to examine charges that follow failed, reversed or delayed transactions and whether complaints were resolved consistently.

This has returned because the previous answer was useful but not strong enough to become a standing rule. Use June 2023 as the new evidence point rather than recycling the earlier conclusion. Failure anecdotes are beginning to drive decisions, although retries and late posting may be making the problem look larger than the affected-customer population.

Can you test these explanations rather than choosing one at the start?
- similar cases receive different remedies
- fees follow customer-caused failure
- bank-side delay creates avoidable charges

The decision is whether a control, remediation population or policy clarification is required. Please give us a one-page finding note plus the underlying CSV for our own review.

You should be able to build the evidence from transaction-level timestamps, channels, amounts, statuses and error context; monthly account snapshots, status events, limits, product enrolments and signatories; customer contacts, complaints and suggestions; debit-order mandates, collection dates, suspensions and cancellations. The analysis can identify patterns and comparable cases; Compliance must interpret policy and legal obligations.

Thanks
