Did the bank charge customers after its own process failed? - 2025 control review

Team,

Before this becomes another standing report, can we answer the real question?

Compliance wants to examine charges that follow failed, reversed or delayed transactions and whether complaints were resolved consistently. The possible stories are that bank-side delay creates avoidable charges, that similar cases receive different remedies, or that fees follow customer-caused failure.

This has returned because the previous answer was useful but not strong enough to become a standing rule. Use November 2025 as the new evidence point rather than recycling the earlier conclusion. Please start with the decision we need to make, then show whether the available evidence is strong enough to support it.

Please prepare a Power BI page with drill-through to a reproducible case list. The output must help us decide whether a control, remediation population or policy clarification is required.

Data available: transaction-level timestamps, channels, amounts, statuses and error context; monthly account snapshots, status events, limits, product enrolments and signatories; customer contacts, complaints and suggestions; debit-order mandates, collection dates, suspensions and cancellations.

Please state the limitation plainly: The analysis can identify patterns and comparable cases; Compliance must interpret policy and legal obligations.

Thanks
