Resolved in the system, but resolved for the customer?

Hi team,

Complaint status alone may overstate resolution when the same customer returns, the transaction remains unresolved or the account closes.

Please start with the decision we need to make, then show whether the available evidence is strong enough to support it.

Can you test these explanations rather than choosing one at the start?

- specific categories lead to repeat contact or attrition
- resolution notes are generic
- resolved complaints do not recur

The decision is which complaint outcomes need quality review and which root causes need fixing. Please give us a control view with the exceptions, owner and reason each item was included.

You should be able to build the evidence from customer contacts, complaints and suggestions; transaction-level timestamps, channels, amounts, statuses and error context; monthly account snapshots, status events, limits, product enrolments and signatories. The analysis can identify recurrence and later behaviour, not customer satisfaction that was never recorded.

Thanks
