Follow-up: the first 30 days after a branch opening

Morning,

I need help with something that sounds simple but probably is not.

Branch Network wants to separate productive onboarding from accounts that never progress beyond opening and initial deposit. The discussion is currently being driven by anecdotes, and the teams involved are describing the same customers differently.

The questions I would ask in the room are:

1. What would we expect to see if card or online activation friction delays use?
2. What evidence would instead support that first useful activity varies by branch?
3. How do we rule out that some customer types need assisted follow-up?

This has returned because the previous answer was useful but not strong enough to become a standing rule. Use February 2025 as the new evidence point rather than recycling the earlier conclusion. Please work towards where branch coaching or onboarding process changes are needed. A useful output would be a control view with the exceptions, owner and reason each item was included.

Use monthly customer and KYC snapshots; monthly account snapshots, status events, limits, product enrolments and signatories; available initial-deposit records up to the request date; transaction-level timestamps, channels, amounts, statuses and error context; ATM attempts, host responses, PIN attempts, blocked-card state and latency. One caution: Do not rank branches on raw volume without controlling for opening month, customer mix and account type.

Regards
