March 2019 tip-off review needed

Team,

We received a tip-off: SIM-swap account takeover tip from a mobile operator.

Please prepare a case view using customer names for the working session, then mask identifiers before anything leaves Financial Crime. Start with Andile Mkhize and Arun Govender; I am not saying they are guilty, only that their names were mentioned in the external note.

We need transaction timeline, channel changes, device or contact changes, linked accounts, cash movements, transfers, failed attempts and any customer communication around the same dates.

Legal may ask for an evidence pack. Police should only receive what Compliance approves.

Aisha
