### June 2023 customer outcome evidence pack

---

Hi team,

Compliance needs evidence that we can explain customer outcomes for June 2023.

Please build a pack covering fees after failed payments, repeated retry attempts, vulnerable customers, suspicious and unusual transaction indicators, complaint handling time and masked customer examples.

The important part is traceability. If someone challenges a number, we must get back to the source file, statement line or communication record.

Do not include raw ID numbers or full account numbers in the pack. Use masked fields for the front view and keep restricted data in the evidence folder.

Michael
