May 2019 business health view before EXCO

Hi Sarah,

Can you give me a simple business health view for May 2019? I want it practical, not a perfect model.

Please show customer activity, newly active accounts, loan repayment pressure, first-use by channel and the top customer pain points. Use the bank data we already have. If the number is draft, mark it as draft.

The board question is simple: are we growing safely, are customers struggling, and where is the bank creating avoidable work?

I have heard repayment issues may be up, but I do not want us to work from corridor numbers. Please use the source files and tell me what is actually happening.

Thanks,
Kabelo
