February 2024 suspicious behaviour without overcalling fraud

Hi,

Financial Crime needs a better triage view. Please do not make it a generic fraud dashboard.

For February 2024, focus on AI-assisted scams, APP fraud, mule accounts and chatbot escalation risks. Show new device or channel, unusual location, payment velocity, repeated small tests, cash-in then rapid transfer, and customers whose behaviour changed suddenly.

Also show why a case might be a false positive, for example late posting, normal fees, payroll timing or a known branch visit.

If there are named external tips, use customer names rather than IDs in the working note. For this month, please include a check around Rebecca Smith if their activity looks unusual.

Aisha
