April 2024 data contract and sensitive fields

Hi all,

For the April 2024 sprint, please confirm which fields are genuinely needed before we publish the next trusted data product.

We will keep raw data in the landing area, standardise the repeatable fields, mask sensitive identifiers for reporting and keep lineage back to the original files.

Known asks so far: customer activity, account status, loan behaviour, communication history, complaint themes, campaign response, fraud indicators and payment exceptions.

Please stop sending screenshots as requirements. If you need an Excel layout, send the column names and the business rule in plain English.

Thabo
