Where does a loan application become a customer problem?

Team,

Before this becomes another standing report, can we answer the real question?

Loan Products wants to understand application drop-off, decline reasons, booked loans and early repayment stress as one journey. The possible stories are that some high-conversion channels create weaker early outcomes, that affordability declines are concentrated by product, or that documentation friction drives drop-off.

There is no confirmed problem yet; this is a request to test an assumption before it becomes policy.

Please prepare a one-page finding note plus the underlying CSV for our own review. The output must help us decide which application step, policy explanation or channel process should change.

Data available: the latest closed loan files available by the request date, including affordability, pricing and origination risk fields; monthly customer and KYC snapshots; customer contacts, complaints and suggestions; collections cases, promises to pay and recovery payments.

Please state the limitation plainly: Do not optimise approval rate without affordability, conduct and later-outcome controls.

Thanks
