Before Legal responds, show exactly what happened to the account - 2023 control review

Hi team,

Legal needs a chronology for accounts closed or restricted where transactions, debit orders or customer contacts continued around the status change.

This has returned because the previous answer was useful but not strong enough to become a standing rule. Use July 2023 as the new evidence point rather than recycling the earlier conclusion. Several teams are reporting more failed or retried activity than they expected, but they do not agree on the cause.

Can you test these explanations rather than choosing one at the start?

- downstream activity continued after the status event
- the main risk is poor communication rather than an incorrect decision
- the closure was operationally complete

The decision is whether the matter can be answered, remediated or requires formal legal review. Please give us a model-ready table, data dictionary and an honest baseline.

You should be able to build the evidence from monthly account snapshots, status events, limits, product enrolments and signatories; transaction-level timestamps, channels, amounts, statuses and error context; debit-order mandates, collection dates, suspensions and cancellations; customer contacts, complaints and suggestions. The analysis can reconstruct events; it cannot determine legal liability or the undisclosed reason for a risk decision.

Thanks
