### **A technically valid fee can still create a poor outcome - 2024 control review**

---

Hi,

This came up in a working session and nobody had the same definition.

Compliance wants to examine charges that follow failed, reversed or delayed transactions and whether complaints were resolved consistently.

I do not want a dashboard that simply counts the outcome. Start with the competing explanations: fees follow customer-caused failure; similar cases receive different remedies; or bank-side delay creates avoidable charges.

Please start with the decision we need to make, then show whether the available evidence is strong enough to support it. This has returned because the previous answer was useful but not strong enough to become a standing rule. Use December 2024 as the new evidence point rather than recycling the earlier conclusion.

What we need to decide is whether a control, remediation population or policy clarification is required. Please bring a Power BI page with drill-through to a reproducible case list, including a few cases we can trace from source to conclusion.

The available evidence is transaction-level timestamps, channels, amounts, statuses and error context; monthly account snapshots, status events, limits, product enrolments and signatories; customer contacts, complaints and suggestions; debit-order mandates, collection dates, suspensions and cancellations. The analysis can identify patterns and comparable cases; Compliance must interpret policy and legal obligations.

Thank you
