### **Customer statement, system record and contact notes need one chronology - 2024 control review**

---

Team,

Before this becomes another standing report, can we answer the real question?

A customer dispute cannot be assessed from the complaint text alone because authorisation, posting, reversal and contact dates differ. The possible stories are that the complaint outcome does not match the underlying evidence, that a bank-side delay caused the loss, or that the customer saw a temporary posting as final.

This has returned because the previous answer was useful but not strong enough to become a standing rule. Use December 2024 as the new evidence point rather than recycling the earlier conclusion. There is no confirmed problem yet; this is a request to test an assumption before it becomes policy.

Please prepare a working Excel file with the exception population and clear columns. The output must help us decide the evidence position and whether remediation should precede correspondence.

Data available: transaction-level timestamps, channels, amounts, statuses and error context; customer contacts, complaints and suggestions; ATM attempts, host responses, PIN attempts, blocked-card state and latency.

Please state the limitation plainly: Use statements only where they exist and do not invent merchant evidence or call recordings.

Thanks
