Did the bank charge customers after its own process failed? - 2025 control review

Team,

Before this becomes another standing report, can we answer the real question?

Compliance wants to examine charges that follow failed, reversed or delayed transactions and whether complaints were resolved consistently. The possible stories are that similar cases receive different remedies, that bank-side delay creates avoidable charges, or that fees follow customer-caused failure.

This has returned because the previous answer was useful but not strong enough to become a standing rule. Use September 2025 as the new evidence point rather than recycling the earlier conclusion. The discussion is currently being driven by anecdotes, and the teams involved are describing the same customers differently.

Please prepare a working Excel file with the exception population and clear columns. The output must help us decide whether a control, remediation population or policy clarification is required.

Data available: transaction-level timestamps, channels, amounts, statuses and error context; monthly account snapshots, status events, limits, product enrolments and signatories; customer contacts, complaints and suggestions; debit-order mandates, collection dates, suspensions and cancellations.

Please state the limitation plainly: The analysis can identify patterns and comparable cases; Compliance must interpret policy and legal obligations.

Thanks
