Please build the evidence before anyone drafts the response - 2025 control review

Hi team,

A customer dispute cannot be assessed from the complaint text alone because authorisation, posting, reversal and contact dates differ.

This has returned because the previous answer was useful but not strong enough to become a standing rule. Use September 2025 as the new evidence point rather than recycling the earlier conclusion. There is no confirmed problem yet; this is a request to test an assumption before it becomes policy.

Can you test these explanations rather than choosing one at the start?

- the customer saw a temporary posting as final
- the complaint outcome does not match the underlying evidence
- a bank-side delay caused the loss

The decision is the evidence position and whether remediation should precede correspondence. Please give us a working Excel file with the exception population and clear columns.

You should be able to build the evidence from transaction-level timestamps, channels, amounts, statuses and error context; customer contacts, complaints and suggestions; ATM attempts, host responses, PIN attempts, blocked-card state and latency. Use statements only where they exist and do not invent merchant evidence or call recordings.

Thanks
