May 2019 launch health view after Q1

Hi Sarah,

Can you help me with a simple launch health view for the first quarter and what has changed so far in May 2019? I want it practical, not a perfect model.

Please show account opening, first real customer activity, first-use by channel, early debit-order pressure, blocked cards or ATM issues, statement requests and the top customer pain points. If the base is too small for a trend, say so plainly and mark it as early.

The board question is simple: are we onboarding customers safely, where are customers getting stuck, and what should we fix before we scale?

I have heard anecdotes about repayment and card issues, but I do not want us to work from corridor numbers. Please use the source files and tell me what is actually happening.

Thanks,
Kabelo
