September 2022 service failures and customer impact

Hi Priya and Thabo,

Ops needs a view of where service failed in September 2022. Please separate true customer error from bank-side delay.

Use the transaction status, channel, posting timestamp, statement date and any timeout indicators. I have heard there were timeout problems, but I want the customer impact, not just a technical count.

Please show worst day, worst channel, affected accounts, repeat incidents and whether the issue created follow-up calls or complaints.

This is for operational resilience, so include the evidence we would need if an incident review is opened.

Peter
