### Tip-off from SAPS Commercial Crimes Unit - need a view on similar customers

---

Hi team,

We had a tip-off from SAPS Commercial Crimes Unit and I need a quick view before Legal and the police liaison meeting.

The names mentioned were Andile Sibanda, Ayanda Mokoena and Sipho Mkhize. Please do not treat this as proof on its own. I want us to check whether our own data shows the same pattern: SIM swaps, password resets and rapid beneficiary changes.

Can Fraud Analytics pull a view across onboarding, customer contact, device/session behaviour, payments and account movement? Legal will want an evidence trail and SAPS may ask us to explain why these customers were or were not escalated.

Please come back with:

- any matching internal customers by name and contact details
- transaction behaviours that support or weaken the concern
- whether we need a typology or dashboard for account takeover suspected
- recommended next step for Legal, AML and Customer Operations

Regards,  
Nandi
