KB 201910 can we agree the data we need

Hi all,

Before we build more dashboards, can we agree what data everyone actually needs?

From what I can tell, Finance needs statement matching, Compliance needs evidence, Product wants customer segments, Ops wants delays, and Credit wants risk flags. These are related but not the same thing.

Can each team confirm the fields they need by Friday? We will create one shared structure with raw files, cleaned transactions, reconciled results and the final reporting tables.

Please avoid sending only screenshots. If you have a sample Excel layout, send that too because it helps us understand the final shape.

Thabo
