KB 202005 customer complaints around fees

Hi team,

We are seeing complaints where customers say they do not understand why a fee appeared after a failed payment or why a transaction only showed later.

Can someone help us with a short presentation?

What I need is quite basic: how many customers had fees after failed payments, whether those customers also had late postings, examples we can use for customer messaging, and any obvious product or channel pattern.

I do not need deep modelling. I need something human enough for service teams to use.

Thanks,
Zanele
