KB 202005 evidence pack for customer impact review

Hi team,

We have a conduct review coming up and I need help pulling together the evidence.

The concern is not one specific system. It is more about whether customers are being charged fees after failed payments, whether retries are reasonable, and whether we can explain late postings if someone asks.

Can you prepare a short presentation with a few examples and the summary counts? Please mask customer names in anything that goes to the wider group.

I do not need a fraud investigation. I need enough to show that we can trace the numbers back to source records.

Regards,
Michael
