KB 202412 settlement follow up

Hi Thabo,

We need to follow up with the sponsor bank, but before we do that I need to know which items are really late and which ones failed properly.

Can you pull a short presentation for debit orders that appeared in our system but not on the bank statement, items that posted one to four days later, duplicate settlement-looking records, reversals and retries?

Please keep the wording simple. The bank team will not understand our internal table names.

Thanks,
Priya
