### KB 202504 help with loan payment questions

---

Hi,

Can someone help us understand what is happening with loan repayments this month?

I am not sure which file you use for this, but we need to see the failed debits, customers who missed more than once, and whether the problem is mostly affordability or just timing. The failure rate I heard was around 4.6% but I do not know if that is final.

Could we get an Excel file I can filter myself by product and province? A simple first version is fine.

Collections also asked if we can flag customers who might need a call before the next debit run.

Regards,  
Mandla
